

International students **in exchange programs** can apply for CROUS university accommodation as the Direction of International mobility has a number of reserved rooms. The rooms in university campus are (sometimes but not always) smaller and less comfortable than a studio in town. But they have financial advantages: they are cheap, are exempt from the housing tax, in most of them charges for electricity and gas are included in the rent so you do not have to deal with the contract and you don't have to have a guarantor.

Warning: The capacity of reception in the university residences being extremely limited, all the requests can not be satisfied.

International students will be required to enter a student social file online on the CROUS website. The DSE must be entered before entering the residence and you will have to pay a fee of € 6.

Here is the list of residences under convention with the University of Lille :
