

Call for applications MOB-LIL-EX – Sep 2026

Excellence Mobility Scholarship from the University of Lille – AAC S2 2026/2027

The University of Lille is launching its ^{second} call for applications for mobility grants called MOB-LIL-EX for **the academic year 2026/2027**.

The objective of the scheme is to support, on the basis of project excellence, the international mobility of students and doctoral candidates from the University of Lille and its partner universities.

For outgoing mobilities: Only students registered administratively at the University of Lille can apply. Applications from students enrolled administratively at another university will not be eligible. Similarly, applications from doctoral students enrolled administratively at another university but affiliated with a research laboratory of the University of Lille will not be eligible. Finally, the MOBILEX scholarship cannot be awarded to a student taking a break.

This call for applications has 3 parts:

- Incoming and outgoing mobility **at the BUT/ MASTER/ ENGINEER level**
- Incoming and outgoing mobility **DOCTORAL LEVEL**
- Outgoing mobilities **from INSPE and the HEALTH sector - Short-term mobilities (internship/study)**

Procedure and conditions for the admissibility of applications:

- For the PhD level, we now require supporting documents for co-financing.
- For all levels, we now ask for the CV in English.
- For outgoing mobilities, **the files not containing the requested BEST simulation** will be rejected and must not be included in the ranking table reported by the components and EGs.
- We no longer indicate the deadline for submitting applications to students and doctoral candidates. The dates for the submission of applications by candidates will be set by the components and doctoral schools, in connection with the research units and departments attached to them. The date of November 9 concerns only the escalation of tables to DIMI by components and EGs.
- After retrieving the link to the MOVEON form, candidates download the documents, fill them out without the advice of the University of Lille, and retrieve a PDF file via MOVEON (print it if necessary).
- Candidates submit their PDF or print files for review with the graduate and component schools (taking into account their own submission dates). We remind you that reviews must be reasoned and different for each candidate.
- Then, the components and EGs directly **attach (deadline of November 9, 2026)** the complete files with ULille opinions and classification tables to moblilex@univ-lille.fr.
- Regarding doctoral students, in order to facilitate the procedure, we have removed the signature step for the laboratory director. The signatures of the research director and the graduate school are still required. We no longer require laboratory classification tables. However, we leave the EGs free to request a laboratory classification if they wish.
- We remind you that the files must be submitted to DIMI by the GEs and NOT by the laboratories.

1. MOBILITES LEVEL BUT/BUETI – MASTER – ENGINEER

OUTBOUND MOBILITIES

	BUT-BUETI/MASTER/ ENGINEER
Type	(Lille → International) Outbound mobility
Duration	3 to 10 months
